Supervised Learning, Unsupervised Learning, Feature Engineering & Data Preprocessing, Model Evaluation.

Forntend

Flutter, HTML, CSS, PHP, JavaScript

Database

MySQL, MongoDB

Tool & Technologies

Code Blocks, VS Code, Android Studio, Apache NetBeans, Sublime Text, Cisco Packet Tracer, Jupiter Notebook. Kaggle.

PROJECTS

CV Jachai

ML-Powered Web Platform for Skill Gap Analysis and Personalized Career Recommendations

09/2025 – Present

CV Jachai is a **machine learning**-based web platform designed to evaluate and enhance students' and professionals' career readiness. It analyzes individual skill sets, identifies gaps relative to industry requirements, and provides personalized career recommendations. The platform leverages data-driven insights to help users improve their CVs, plan skill development, and align their career paths with market demands.

Skill Bridge

Job Portal

04/2025 – 05/2025

SkillBridge is a lightweight job portal web application designed to connect job seekers with employers. Users can register, log in, browse available job posts, and apply directly through the system. Employers can post new jobs and view applicants. The platform is built using **HTML & CSS** for the frontend and **PHP & MySQL** for backend logic and database management. It follows a clean, secure, and modular structure, making it easy to use, maintain, and extend.

COURSES

Frontend Development

Programming Hero

12/2025 – Present | Dhaka, Bangladesh

CERTIFICATES

- CyberTech Computer Office Application
